*Notes for the " B " Volume of the Gazetteer
of the Benares district, 1911—1921.*

Page 85.

Census of 1921.—In the years 1911 to 1921 the population of the district increased by 4,277 only. The paucity of this increase is due largely to a severe outbreak of influenza which occurred in 1918, when mortality reached the abnormal figure of 76·74 per thousand. Plague and cholera have also taken their toll, but the former has of late years exhibited less virulence.

Page 153.

Police stations.—In January, 1920 Ramnagar police station was transferred to Benares State. Sindhora is now an out-post of Phulpur police station. Several changes involving the abolition of Sakaldiha, Jaitpura, and Sikraul thanas, the re-establishment of a thana at Chaubepur, and the transfer of Alinagar thana to Moghal Sarai are under contemplation. If these are effected, the number of police stations in the district will be reduced from 19 to 17.

Page 154.

Police force.—The present strength and distribution of the police force will be found in appendix XVII-A. It consists at present of 54 sub-inspectors, 118 head constables, and 1,078 men, apart from a force of 1 sub-inspector, 3 head constables, and 33 men of the mounted police who are also attached to the district. All ranks have recently received an increase of pay, which in the case of constables comes to approximately double the pay in 1911. The number of village chaukidars has been reduced from 1,413 to 1,113, and a further reduction is under consideration.

ows a tendency to increase, and includes people of castes other than Doms and Bhars. For some years past railway theft has been rife in the Alinagar and Sakaldiha circles. The inhabitants of many villages situated along the main and chord lines of the East Indian Railway were encouraged to this form of crime by the facility with which they could conceal their presence in the Goods Yards, which now extend to a distance of over 3 miles from Moghal Sarai junction.

At the close of 1921 the non-co-operation movement culminated in disturbances in various parts of the city, but the agitation was quickly brought under control and never attained serious proportions.

One thousand seven hundred and thirty-four persons were registered under the Criminal Tribes Act between 1911 and 1921. They include 955 Bhars, 755 Doms, and 76 Karwals

Page 158.

Excise — The district continued under the Distillery System until 1921, when the contract system was introduced. Under this, the distillery building became a bonded warehouse, where liquor was stored by the Indian Distillery Company, Cawnpore, and issued to retail shops at a price settled by the Company with the Commissioner of Excise

Page 162

Opium — Since 1912-13 shops have been allotted to persons of approved character, and the quantity for issue to each shop has been fixed. In 1918-19 the surcharge system was introduced, and opium was issued at Rs 40 a seer. This price was subsequently raised to Rs. 45 in 1920-21 and to Rs. 55 in 1921-22, while a surcharge duty at Rs. 15 was also levied on each seer purchased

preliminary assessment was reduced in consequence by Rs. 14,302. The Excess Profits Duty came into force from April 1, 1919 but the additional income which it produced was hardly creditable to a trading centre like Benares. In 1920-21 the net demand on account of income-tax amounted to Rs. 1,74,886.

Page 168.

Constitution of municipality — With the introduction of the United Provinces Municipalities Act of 1916, several changes were effected. The board elected a non-official Chairman and appointed an Executive Officer. The number of nominated members was reduced to two. Mahommedans were granted separate representation, and sent up eight members from their community. The entire body of members is now re-elected every third year. On March 1, 1914 a provincial service of Health Officers was inaugurated, and one of these is now an official of the board.

Page 170.

District board — Under G. O. no. 856/IX—3649, dated October 1, 1914, the whole of the local rates are now credited to the board's fund. The chief development in the board's activities is in the Educational department. From 1919 onwards Government has made a series of special grants for the expansion of primary and secondary education and the improvement of teachers' pay; and by 1921 the ratio of... scholars per 1,000 of the population in rural areas reached 38.9, the highest in the Province.

The board has also increased the number of pounds and ferries in its jurisdiction, but the number of hospitals remains the same as in 1911.

Page 177

Hospitals and dispensaries. — In the year 1911 a new barrack for lepers and a mortuary were constructed at the Raja Kali Shankar Asylum. A tuberculosis dispensary and a new mortuary have also been erected in King Edward VII Hospital.

Page 241.

The river front, Bhelupur — The fortress built by Baijnath Misir which was bequeathed to the descendants of the reigning house of Delhi has now been sold.

The municipality has recently constructed a road to link the Assi Road with the Harish Chandra ghat which it has also improved. This ghat is associated with a famous Raja, who after giving away his kingdom worked for a time under the Doms who maintain a cremation ghat there.

Page 246.

A portion of the Bhelupur road known as Ramapura road has been widened. A pound and octroi barrier have been established here.

Page 248.

Dassasumedh ward.—The bazar close to the Dassasumedh ghat has been converted into a market on modern lines and is now known as the Radice market after the name of a very popular Collector of the district

Page 249.

The Laksa road has been improved by the construction of drains and proper foot-paths

Page 253.

Kotwali ward.—The Bishesharganj market has been extended and rat-proof floors have been introduced. A school has also been opened in the neighbourhood.

Page 254

Adampura ward.—Two municipal schools and Doms' quarters have been built at Machhodri.

Page 257.

Jaitpura ward.—A school and a vaccination station have been established in Alaiपुर, and a temporary segregation hospital located in its northern quarter.

Page 258.

Chetganj ward.—On the south side of the Chetganj Road the municipal offices have now taken the place of the old municipal workshops. At Pitarkunda tank a vegetable market has been established and nearby quarters for Doms and a vaccination centre have been erected

Page 260

Sikrauli ward.—A vegetable market has now been established near Nandesar tank.

A municipal school has been constructed at the junction of Hukulganj, Khajuri, and Chah Pisanaharia bastis.

Page 264.

Drainage—The drainage system has been gradually extended in the last 10 years. The main sewer now has 40 branches; 14 new sewers have been constructed, the chief of which is the Ghat Intercepting Sewer, which runs from Dassasumedh to Tilochan ghat, and collects all the sullage between them.

Page 265.

Many of the old Nawabi drains have been cleared, repaired, and connected; and pipe sewers, manholes, and gully pits have been added in a number of places, but progress especially in the pakka mahals has been slow.

Water-works.—One High Duty Worthington engine capable of pumping 8,333 gallons a minute was set up at Bhadani pumping station in 1911. A few years ago a rising main was also laid down. The raised reservoir which was constructed in 1898 is inadequate to cope with the demand which comes to nearly 7 million gallons a day in the hot weather. This increase is due to the addition year by year of house connections; there are now some 12,000 house connections and 433 stand-posts. Two tube wells were sunk in the compound of the Distributing Station in August, 1919, and have till now been driven by an oil compressor engine lent by the Government Well-Boring department.

The cost of maintaining the water-works is about a lakh and a half; and the consumption of water comes to 33·7 gallons per head of population.

Page 265.

Benares tahsil.—Pargana Kaswar Raja has been transferred from the Maharaja's Family Domains to the British Government. This has effected a change in the number of parganas as well as in the area and revenue of Benares tahsil. Its area is now 378,131 acres, and revenue Rs 6,13,627.

Page 269.

Chandauli tahsil.—Eight villages of this tahsil have been transferred to Benares State. The area now comes to 269,007 acres as compared with 272,438 acres in 1910, and the revenue to Rs. 2,74,618 as compared with Rs. 2,80,357.

Page 362

Sarnath.—During the years 1911-12 considerable progress has been made with the exploration and conservation of the Buddhist remains at Sarnath. In the year 1914-15 Mr Hargreaves carried out further excavations in the area to the east north, and west of the Main Shrine. In the last mentioned area he laid bare the remains of an early apsidal temple and a large mass of fragmentary sculptures bearing figures of men and animals which must have been carved in the late Maurya or Sunga period. They bear the same lustrous polish as we find on the stone pillars of Asoka. Some of these fragments bear dedicatory inscriptions which show that these monuments were constructed by traders and other private individuals from Ujjayini (modern Ujjain) and Pataliputra or Patna. An equally remarkable result of Mr. Hargreaves's excavations was the discovery of three standing images of Buddha bearing inscriptions dated in the years 154 and 157 (473 and 476 A.D.) respectively of the Gupta era in the reigns of Kumaragupta and Budhagupta of the Imperial Gupta dynasty. These inscriptions possess a special interest, as they have led to a considerable modification of the accepted scheme of the Gupta genealogy.

The operations carried out from 1917 to 1921 under the supervision of Rai Bahadur Daya Ram Sahni, M.A., consisted on the one hand in the general clearance and improvement of the whole of the acquired area and the conservation of the buildings laid bare in the previous exploration, and on the other in excavation of different parts of the site. The most noteworthy undertaking of the latter description was the examination of the unexplored area to the east of the Main Shrine which led to the discovery of an extensive fore-court which was added to the Main Shrine about the 8th or 9th

century A.D. The structures excavated inside this court-yard include a shrine of the goddess Varahi of the 11th century A.D., and a large number of brick stupas. The earliest and most interesting of these monuments is the plinth of a Gupta Stupa which is decorated on all sides with carvings in a highly refined style.

Another interesting structure which has been completely excavated during the period is a late mediaeval shrine approached through a covered underground passage 160 feet in length. The exact purpose of this monument has not yet been ascertained but it would appear to have been intended for the monks' retirement into solitude for the performance of spiritual practices.

"Almost opposite Ramnagar on the left bank of the Ganges is the Benares Hindu University the foundation stone of which was laid by the Viceroy in 1916. It is situated in very extensive grounds and contains many fine buildings including an engineering college, various Science laboratories, and five commodious hostels. The present number of students is nearly 2,000."

Notes for the District Gazetteer, Jaunpur.

Page 58.

The Co-operative town bank has developed into a District Co-operative Bank, with its registered office at Jaunpur. All registered Co-operative Societies in the district are now financed, audited, and supervised by this district bank, which is managed by a board of directors, with the Collector of the district as the *ex officio* Chairman. None of the Societies are now financed by the Dube Estate or any other private individual. In 1924, the total number of Working Societies was 137, and that of Societies under liquidation 46, out of which 21 have since been closed down.

Page 61

For "The leading firm . Shiekh," substitute—"The manufacture of perfumes is practically in the hands of the local Mussulmans, the leading firm being that of Sajjad Husain Khan,"

Pages 67, 68, and 69.

Under "Provincial roads" *add* the words "and maintenance" after "upkeep," in the first sentence and *delete* the whole sentence beginning with "The former authority.. ." and ending with " . . local funds." The complete transfer of local roads from the Public Works department to the District Board was effected from October, 1924. Between the words "Dohrighat" and "and" *insert* "the road from Jaunpur to Benares; the Naigang road," and *for* "45 miles" *read* "65 miles "

Under "Local Roads," it has to be noted that the metalling of the local road from Janghai to Machhlisshahr was completed in 1912, and the road from Jaunpur to Benares was provincialized in April, 1910 as a part of the Lucknow-Benares road.

For "151 miles" now *read* "140 miles" and *for* "390 miles," and "587 miles" *substitute* "415 miles" and "620 miles" respectively.

Page 70.

At the end of the paragraph for "Bridges and ferries," *add* "of late years, however, there has been a tendency for increase as a result of general competition among bidders and the average annual income for the last ten years ending in 1923-24 was about Rs 19,500."

Chapter III Page 73.

In the paragraph for "Census of 1901" *substitute* the word "next" for "last," and after this paragraph *add* the following two new paragraphs.—

Census of 1911.—The Census of 1911 showed a further decrease of 5.9 per cent. as compared with that of 1901, the total population being 1,156,254. But such was the case in all the eastern districts. This was mainly due to high mortality caused by plague and fever. The density fell to an average of 746 to the square mile, the average for the Benares division being 461. Of the five tahsils, Jaunpur came out first with a density of 881, followed by Kerakat with 783 and Mariahu with 752, while Shahganj showed 695 and Machhlisshahr 657.

Census of 1921—In spite of the heavy toll taken by an epidemic of influenza in 1918, when mortality reached the record figure of 90.20 per thousand, the population, as recorded in 1921, was 1,155,105, that is to say, only 1,149 below that of 1911. The density remained practically the same, namely 745 to the square mile, and the relative position of the various tahsils was much the same. It is interesting to note, however, that the net variation in population during the period 1872 to 1921, is on the plus side by 129, 144.

Page 75.

At the end of the paragraph for "Towns and Villages" *add* the following:—

"The number of inhabited towns and villages in the census of 1921, was 3,141, as against 3,176 of 1911, of which only Jaunpur city and the towns of Machhlisshahr and Shahganj contained a population of over 5,000. The total urban population in 1921 was 7.1 per cent. of the whole."

Under "Sex" *add* "recorded in 1901" *after* "total population," and *insert* the following after second sentence:—

"The subsequent censuses of 1911 and 1921 have also shown a steady increase in the number of females in this district, Mariahu tahsil heading the list."

Page 76.

Under "Religions," *add* the following after first sentence:—

"About the same percentage was found in the succeeding enumerations of 1911 and 1921 also."

Delete third sentence beginning with "of the remainder" and ending with "in Government Service" and *substitute*—
"Of the total population recorded in 1921, 10,52,831 were Hindus, 101,563 Mussalmans, 590 Arya Samaj, and 121 Christians."

In the fourth sentence from bottom, *substitute* the following for "and this is the only district ..Jains," ' and in the census of 1921 no Sikhs or Jains were found at all,"

B Volume, page 5.

Between the sections 'Famine and Bank,'

Insert sections 'Prices' and 'wages' as given below.

Prices 54-55.

At the end of the existing section *add* .

"The latter half of the last decade was marked by a general rise of prices on account of the Great War and its after effects, prices rising to 4 seers per rupee in the case of wheat, 6 seers for barley, 3 for rice, and 7½ for jwar, etc."

Wages 56.

At the end of the existing section *add* .

"The distinguishing feature of the last decade is the high level to which wages have reached on account of the general rise in prices and a perceptible change in the system of their payment in the rural areas. An ordinary labourer in the city gets about 7 annas a day while a skilled labourer is not content with anything less than a rupee a day. In the villages payment in kind is fast giving way to cash payments of wages"

B Volume, page 5.

Substitute the following instead of the existing section about Bank and Cooperative Credit Societies.

"Strictly speaking, there is no bank in the district except one that deals with Cooperative Societies only and is known as the District Cooperative Bank. The idea of starting cooperative societies in this district and of devising means to finance them took the shape of what were known as putti societies, directly financed by the Government. The second step was the opening of the Organization Fund in January, 1912 with the object of reorganizing the existing societies and providing credit and banking facilities for registered societies. At that time there were only 8 societies in the district with a reserve fund of Rs. 3,711-9-7 in 1913 and a working fund of about Rs. 3,000. With the growing need of organizing and financing the societies it was found necessary to start a bank in the district on approved lines. It was thus that the Ghazipur District Cooperative Bank was established and commenced its work from July, 1915. In November, 1915, the old Organization Fund was amalgamated with this bank to which its assets and liabilities were also transferred. Since then the bank has made steady progress under the able management of Rai Sahib Babu Jawahur Lal Sinha, Honorary Managing Director. The number of societies rose from 16 in 1915 to 21 in 1916-17, to 30 in 1917-18, to 70 in 1919-20 and to 95 in 1920-21. The chief task now in front of the Honorary Manager is to consolidate the position of all these societies and place them on a sound basis before proceeding with schemes for further expansion.

In the first year of the working of the bank there was a loss of Rs. 110 but since then the profits have increased in proportion to the increase in the working capital. In 1915 it was about Rs. 46,000 and at present it is about Rs. 95,000.

B Volume, page 7, line 18.

Delete "known as the Factory Superintendent" and *substitute* "known as the Managing Director assisted by the Factory Superintendent."

B Volume, page 7, line 36.

Add "A considerable amount of opium is now supplied by the States in Central India, where poppy is grown under State control. The amount so supplied is about 13,000 maunds annually. It is used exclusively for excise opium."

During the war a considerable demand for opium and alkaloids sprang up in Europe, owing to the cutting off of the Turkish supply 1,696,240 lbs. of opium and 2,116 lbs. of morphia were sent to England from the factory at Ghazipur."

B Volume, page 9.

Line 15 and 16 *delete* "Now amount to increase" and *substitute*.

"The quantity of Excise Opium amounted in 1911 to 14,000 maunds but has since decreased and now amounts to 7,000 maunds only. The reason for the decline is decrease in its consumption due to its high price."

B Volume, page 9, lines 17 and 18

Omit, as contraband opium is never used in any way in the manufacture of provision opium

B Volume, page 9, line 5.

From bottom. *Alter* "is" to "used to be."

B Volume, page 9, line 3.

From bottom *after* "monthly" *add*. "but the export of alkaloids to London has now ceased, owing to a fall in the demand."

B Volume, page 10.

Delete lines 24-30, *i.e.*, *delete* "The last census 3,238" and *substitute* "The census of 1911 showed another heavy decline to 839,725, while in 1921 the population had decreased still further to 832,239. All the four tahsils shared in the decrease which is due partly to emigration but mainly to the heavy death-rate, plague taking a heavy toll of life every year, while the influenza epidemic of 1918 carried off no fewer than 56,569 persons. During the last 5 years, the death-rate has been considerably higher than the birth-rate."

The number of inland emigrants registered during the last 10 years is 1,510 as against 6,365 in the previous decade and that of colonial emigrants is 379 as against 3,238."

B Volume, page 11

Delete lines 9—13 i.e., delete "Of the 9·11 per cent." and substitute "At the censuses of 1911, Hindus numbered, 762,435, Muhammahans 76,561, Christians 568, Aryans 155, Jains 1 and Sikhs 5. By 1921 the number of Hindus was found to have fallen to 755,834 and of Muhammadans to 75,784, while the followers of other religions numbered only 621, Hindus thus constitute 90·82 per cent of the total and Muhammadans only 9·10 per cent.

B Volume, page 12

Add after line 5 "The war very seriously affected the work of the Lutheran Mission owing to its connection with Germany. The missionaries in Ghazipur, the Rev. H. Lorbeer and his son, were not however interned owing to the fact that they were naturalized British subjects. They were able to maintain the work of the Mission to some extent because they derived a considerable income from the sale of medicines. Lorbeer's snake-bite and cholera cures were popular remedies over a wide area. In 1919, however, Mr. Lorbeer Senior died and the younger missionary retired from the district. The Wesleyan Methodist Missionary Society then entered into the property and took over the work. The Government before this had set up a trust to administer property belonging to German Missions.

The Mission High School was taken over by Government at the beginning of the war and is still run as a Government school.

The Lutheran Mission and the Methodist Episcopal Mission during the decade under review had considerable success in work amongst Chamars at the Eastern end of the district. The community of Christians belonging to the Lutheran Mission south of the Ganges diminished considerably during the war by migrations to more populous centres "

Page 148.—EDUCATION.

Add after community in line 10.

Consequent on the Government grant for the expansion of vernacular education, the number of secondary and primary schools has been raised considerably within the last 10 years.

The number of vernacular middle schools has risen from 7 to 11, located at Ghazipur, Muhammadabad, Bahadurganj, Saidpur, Sadat, Karanda, Zamania, Nauli, Kamalpur, Reotipur and Gahmar.

Besides these district board schools there are three aided vernacular middle schools, at Ghazipur proper, Birno and Dharui. The number of scholars reading in these institutions is 1,261 and 127 respectively.

On account of the expansion of primary education, the training classes rose in number from 4 to 15 but since July 1922, the number has again been reduced to 6, the number of untrained teachers being now small.

The present training classes are situated at the headquarters of the four tahsils and at Birno and Dildarnagar.

The number of district board primary schools is 270 against 98, ten years ago, and the total number of scholars is 17,515, including a fair number of girls

There are also district board girls' schools at Saidpur, Mainpur, Kamalpur and Birpur with 149 scholars.

In addition to these district board schools there are 36 aided schools including 14 aided maktabas, specially for Muhammadan

boys and girls, six night schools specially for sons of artisans and labourers with 500 scholars. There are also three aided schools for the education of boys of the depressed classes at Muhammadabad, Saidpur and Zamania. The number of scholars in these institutions is 51. There are 13 aided girls' schools, with 354 scholars in them.

A special feature of education during recent years has been the establishment of special schools for the education of Muhammadan boys. These Islamia schools are 33 in number and have an enrolment of 1,045 scholars.

*Notes for the C Volume of the Gazetteer of the Ballia district,
1911—21.*

Page 1.—BOUNDARIES AND AREA.

In 1912 the area of the whole district was 796,278 acres or 1,244 square miles. The area in 1922 rose to 798,086 acres or 1,247 square miles. The increase is due to alluvion.

Pages 6—9.—THE GANGES

There was a record flood in the Ganges in 1916. The highest flood level was 18·9". It caused much loss in the area affected by it. To the municipality of Ballia the loss caused amounted to not less than Rs. 5,535 and to the district board about Rs. 53,800, within the Ballia municipality not less than 1,799 houses, the value of which was estimated to be Rs. 2,64,575, fell down. Parganas Ballia, Doaba, Gadha and Kopachit East were the affected areas and in them some 13,301 houses entirely collapsed and 6,052 houses partly collapsed. The damage to the houses was estimated as much as Rs. 3,82,435. The damage to the kharif crops, stores of food and fodder in the villages affected was estimated to be Re. 0-14-0 0-6-9 and 0-8-8, respectively. Seventeen persons were reported to have been washed away by the floods. In order to protect the Ballia town from floods a bund was built by Government at a cost of about Rs. 64,000. This bund saved the town from inundation in the succeeding years but was breached in many places by the floods of 1923. This necessitated the construction of a new bund which skirts the actually inhabited area of the town. Another new alignment was sanctioned in 1924 and constructed by the municipality with a grant from Government of Rs. 9,309. In 1925 the management of all the bundhs which had been under the control of the Public Works department was handed over to the municipal board under the control of the District Officer and an annual grant of Rs. 500 is allowed by Government for their up-keep.

Page 13 (add before last line).

The heavy floods that have been experienced almost annually since 1916 specially when they come early in the monsoon season and before the rice area of the Surha Tal has been

planted have caused serious loss to the cultivators of that area, a sluice gate at the mouth of the Katehar nala would protect the area from such loss and should not be prohibited either from a point of view of expense or engineering feasibility

Pages 14-15.—WASTE LANDS.

In 1922 the total waste land in the district was 125,062 acres in Ballia tahsil, 51,748 acres, in Bansidh 41,179 acres and in Rasra 32,135 acres.

The figures on comparison show that there was a decrease in the number of females by 17,522, whereas an increase in that of males by 2,765. This decrease must obviously be attributed to mortality.
